Dear Kathy:

As discussed in our telephone conversation of Monday, August 17, 1992, a meeting between your staff and members of Killam's staff is confirmed for August 27, 1992 at ten o'clock in the morning. The staff from Killam who will be attending this meeting includes the following people:

William Hoehlein
Gary K. Walker
Aliya Aslam
Debbie Nardacci

Senior Associate
Senior Project Scientist
Senior Engineer
Assistant Engineer

In addition, the following is a listing of the issues we wish to discuss regarding the former Hexcel site:

- Item 1: The Groundwater Recovery System: (Upon issuance of the NJPDES SIU Permit, Killam wishes to begin start-up procedures. It has been verbally communicated that the permit is to be received by the end of August, 1992.)
- Item 2: Groundwater Monitoring Plan
- Item 3: DNAPL Monitoring Plan
- Item 4: LNAPL Monitoring Plan
- Item 5: Outstanding Report(s)
- Item 6: Outstanding Information
- Item 7: Remediation Proposals
- Item 8: Tanks 9, 10, 11 & 12: (Killam was alerted to the idea that the area under these ASTs is to be cleaned. However, information from Heritage states that they were investigating a soil vapor extraction system to remediate this area.)
- Item 9: Sanitary Sewer

SDMS Document

Item 10: Other items: (Other outstanding items with the NJDEPE.)

The aforementioned issues are compiled from the December 23, 1991 and the March 5, 1992 letter from the NJDEPE to the Hexcel Corporation. Based upon what Killam has reviewed, it is somewhat unclear as to what the NJDEPE is truly requiring and what Heritage has/has not done in response to these requirements.

Very truly yours,

KILLAM ASSOCIATES

Debra J. Nardacci
Assistant Engineer
